- **Welding Simulation User Group Meeting, October 4th in Detroit. Topics to cover:**
- **Developments in optimized weld schedules**
- **Developments in welding new AHSS steels**
- **Discussions in reducing costs through weld simulation planning & implementation**
- **Contact Kevin or Nigel at 416-747-1611 to participate and contribute.**

Huys NEW patent pending

**PARA-CAPS™!**

- **Unique Parabola design**
- **Internal fins assist cooling**
- **Superior results on coated and new AHSS steels**
- **Longer life from good heat management**

Research, testing and development on three continents—North America, Asia and Europe—have led to four patents pending for the NEW HUYS **PARABOLIC** electrode that effectively combines the best characteristics of truncated, protrusion and domed style electrodes. The unique **PARABOLIC** design combines the attributes of traditional electrodes with new ideas such as **thermodynamically designed internal fins** to assist electrode cooling through increased surface area.
